Lateral

Drought-stressed bermudagrass. College Station, TX

Wetting Agent for Drought-Stressed Turf

- Keeps turfgrass healthier & greener during drought conditions.
- Maintains turfgrass during lack of rainfall or reduced irrigation periods.
- Helps water infiltrate and penetrate into water-repellent soils, reducing runoff.
- Easy-to-use granular formulation on environmentally-friendly paper carrier.

Directions for Use:

Apply 2.5 lbs. per 1000 sq. ft. monthly throughout the growing season. For best results, apply before drought conditions appear and follow application with 0.25" of water.
