## GENERAL INFORMATION

**DOUBLE COVERAGE™** is an industry-standard methylated seed oil (MSO) and organosilicone (OSS) blend that significantly boosts the field performance of active ingredients whose labels recommend an oil adjuvant.

**DOUBLE COVERAGE™** thoroughly wets the canopy and helps to increase the spread and penetration of the spray application through waxy or weather hardened cuticles.

**DOUBLE COVERAGE™** improves uptake of the active ingredient and its distribution to the mode of action site.

## DIRECTIONS FOR USE

Follow the directions on the most restrictive active ingredient tank mix partner label.

Tank mixtures should only be applied within the label recommendations of every product in the tank mixture.

Use only if a methylated seed oil (MSO) and organosilicone surfactant (OSS) is allowed or not excluded on the label.

**DOUBLE COVERAGE™** is compatible with most active ingredients in crop and non-crop areas.

Recommended for use with most active ingredients such as glyphosate and 2,4-D.

**DOUBLE COVERAGE™** does NOT contain ammonium sulfate.

If the user does not have experience with the mixture being applied, perform a jar test using the order and amounts in the mixture and perform a phytotoxicity test to ensure crop safety.

## Order of addition

In general, follow the W-A-L-E-S plan when adding herbicides to a tank mix.

1. Wettable Powders (WP) then Flowables (F, DF)
2. Agitate then add anti-foaming compounds, buffers
3. Liquid and Soluble products
4. Emulsifiable concentrates (EC)
5. **DOUBLE COVERAGE™** and other adjuvants

Prior to mixing fill the spray tank with half of the carrier. Then start the sprayer and check to make sure that all valves and gauges work and that there is proper tank agitation.
