

Enhance the natural beauty of water features

# BOWL GAME™ BLUE or BLACK

## Pond Dye

- Ideal for all ponds, lakes or fountains
- Safe for aquatic species, wildlife, humans and pets
- Will not interrupt irrigation schedules or recreational activities

**Bowl Game™** pond dyes are concentrated colorants that enhance the beautiful natural appearance for any lake, pond or fountain. **Bowl Game™** pond dyes are safe for fish and aquatic species, waterfowl, wildlife and pets. It is a non-corrosive dye and when used according to recommended rates will not stain stone, fountains, aquatic features or swimwear.

- Restores the reflective luster to water features that have become dingy and off colored
  - Obscures visibility into the water
- Reduces sunlight penetration
- Blue or Black dyes are available in liquid or water soluble bags (WSB)
  - Liquid: Improved control of color intensity
  - WSB: Simplified clean up with less waste

## IDEAL FOR

- Water features on golf courses, parks, campuses and other public areas
- Retention ponds and irrigation reservoirs
- Any closed water system such as lakes, ponds, fountains and more

## HOW IT WORKS

These dyes are non-toxic and are safe for animals living in, swimming in, or drinking from the body of water that contains **Bowl Game™**. While blue has been the preferred dye color, black is becoming more popular due to the natural reflective surface it achieves.

- Disperses with natural currents and windblown water movement

### Available In Blue or Black:

Liquid - 1 Gallon Jugs

Powder - 1 box with 40 water soluble bags (WSB)

## HOW TO USE

- Liquid: Pour the appropriate amount of dye into the water at different points around the edge of the body of water
- WSB: Drop or toss the recommended number of WSBs into different points in and around the body of water
- Place directly into mechanical circulation systems for faster dispersal
- Handle with care, as the dye will stain rocks, decking and other porous surfaces if spilled or applied as a concentrate
- For use in impounded water systems where the colorant will be contained

## RECOMMENDED USE RATES

<b>Liquid Formulation</b>	1 gallon per 4 acre-feet of water
<b>Water Soluble Bag</b>	1 bag per acre-foot of water

Use rate may be adjusted as needed to vary the intensity of the color

NOTE: **Bowl Game™** is broken down gradually through biological processes, photodegradation, chlorination, and precipitation dilution. Reapply every two to four weeks as needed to maintain the reflective quality of the water surface.

## QUALITY ASSURANCE

*Exacto® products are manufactured with pride at our production facility in Sharon, Wisconsin. Each batch is inspected by our Quality Assurance Team to ensure it meets our high standards.*
