

EndZone™

NONIONIC SURFACTANT • DEPOSITION AID
DRIFT REDUCTION AGENT • PENETRANT

PRINCIPAL FUNCTIONING AGENTS

A proprietary blend of ethoxylated phospholipid, oleic acid and alcohol ethoxylate 100.0%
TOTAL 100.0%

All ingredients are exempt from tolerance under 40 CFR 180.

Surfactant content-70%

PATENTED

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS

Read label before use. Keep container tightly closed. Keep only in original container. Avoid breathing vapors or spray. Wash contaminated areas thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves, protective clothing, and eye protection.

FIRST AID

Have the product container with you if calling a poison control center or doctor or going for treatment.

IF SWALLOWED: Unless advised otherwise by a poison control center or doctor, have person rinse mouth with water, if able. Call a poison center or physician to specify the appropriate source of emergency medical advice if you feel unwell.

IF ON SKIN OR CLOTHING: Wash with plenty of soap and water for several minutes.

IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

IF IN EYES: Rinse cautiously with water. Remove contact lenses if present and easy to do then continue rinsing.

GENERAL INFORMATION

EndZone is a non-volatile, nonionic surfactant (NIS), deposition aid, and oil-emulsion drift reduction agent (DRA) formulated to minimize off-target movement by increasing droplet size for better deposition. It enhances application efficiency by maximizing spray coverage and reducing droplet bounce to reach the target site.

Superior spreading and wetting characteristics help to improve the performance of the active ingredient by ensuring uniform surface coverage.

Increases penetration through waxy, wetting resistant cuticles and enhances permeation of the active ingredient to the mode of action site.

DIRECTIONS FOR USE

Always follow the directions on the most restrictive active ingredient label.

Tank mixtures should only be applied within the label recommendations of every product in the tank mixture.

Use only if a deposition agent and NIS are allowed or not excluded on the label.

EndZone is recommended for use on all agricultural crops and non-crops and is compatible with most pesticides.

EndZone may be used in aquatic applications. Follow the instructions for use on the aquatic herbicide label.

EndZone does NOT contain ammonium sulfate (AMS).

NOTE: When combining new or unfamiliar components in any tank mix, the applicator should conduct phytotoxicity and jar tests to ensure chemical compatibility and avoid damage to non-targeted species.

Order of addition

In general, follow the W-A-L-E-S plan when adding herbicides to a tank mix.

1. Wettable Powders (WP) then Flowables (F, DF)
2. Agitate then add anti-foaming compounds.
3. Liquid and Soluble products
4. Emulsifiable concentrates (EC)
5. **EndZone** or other adjuvants

Prior to mixing, fill the spray tank with half of the carrier. Start the sprayer and check to make sure that all valves and gauges work and that there is adequate tank agitation.

USE RATES

Application	Per 100 gallons spray solution	% v/v
Herbicides	1–4 pt	0.125–0.5%
Fungicides and insecticides	0.5–2 pt	0.0625–0.25%

Ground boom spray drift buffer reduction

0.3% v/v ESA compliant

The optimal rate of **EndZone** may vary with environmental conditions and spray water quality. As field and application conditions change, an experienced operator should adjust the rates as needed.

STORAGE AND DISPOSAL

Storage: Store in a cool well-ventilated place. Keep in original container tightly closed. Do not reuse empty container. Do not store with food, feed, or other material to be used or consumed by humans or animals. Do not contaminate water supplies. STORE BETWEEN 40° AND 90° F. SHAKE WELL BEFORE USING.

Disposal: Do not contaminate water, food or feed by storage or disposal. Dispose of contents in container to an approved waste disposal facility in accordance with all local/ regional/ national/ international regulations. Triple rinse (or equivalent) adding rinse water to application tank. Offer container for recycling or dispose of in a sanitary landfill or by other procedures approved by local regulations. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org.
